John Dempsey Hospital is the acute care general hospital associated with the University of Connecticut Health Center. John Dempsey Hospital offers a wide range of routine and specialty services, provided under the direction of the full-time faculty of the School of Medicine as well as community physicians. Conveniently located near the intersection of Routes 84 and 9 in Farmington, the hospital serves both the immediate Farmington Valley/Greater Hartford community, and is a referral center for patients throughout the state and the region. John Dempsey Hospital's outpatient services include laboratory, diagnostic imaging and therapeutic radiology, rehabilitation, comprehensive cancer services, and cardiac evaluation services.

Surgery services ranging from routine GI to intensive orthopedic procedures are provided in state-of-the-art facilities. Routine inpatient services are offered as well as specialized services in oncology and psychiatry. John Dempsey Hospital offers a full range of outpatient and inpatient cardiac services providing efficient coordination of care across the continuum, from diagnostic services through open-heart surgery. The hospital is well-known for its high-risk maternity services and it has remodeled birthing suites for normal deliveries. The neonatal intensive care unit continues to serve families, communities, and hospitals throughout the state and the region with inpatient services, transport, telephone consultation, and education services.

John Dempsey Hospital, in association with the Schools of Medicine and Dental Medicine at the University of Connecticut Health Center, provides for the development of specialized programs translating the latest research and technology into excellence in patient care. Four signature programs represent the focus of our clinical activities:

The Pat and Jim Calhoun Cardiology Center

- Cardiac Care
- Heart Rhythm Program
- Valve Program
- Vascular Program

The Carole and Ray Neag Comprehensive Cancer Center

- Breast, Prostate, GI, Melanoma, Colon Cancer Prevention

New England Musculoskeletal Institute

- Joint Preservation and Replacement
- Arthritis
- Osteoporosis
- Sports Medicine
- Implant and Reconstructive Dentistry

Public Health

- Education and collaboration to improve health within Connecticut

CENTERS OF EXCELLENCE

Neonatal Intensive Care
High-Risk Maternity
Geriatric Services

SERVING OUR COMMUNITY'S NEEDS

The University of Connecticut Health Center and its John Dempsey Hospital are committed to promoting and maintaining the wellness of Connecticut's citizens. Some of our many community-oriented and community-based health programs offered for public participation are listed below.

The Discovery Series

These popular evening programs held at the UConn Health Center are offered to the public and are always free. Physicians present health and wellness information on a variety of current topics such as cancer, cardiac care, orthopaedics, neurology, psychiatry, primary care, diabetes, and stroke. For more information, visit health.uchc.edu/commprograms/index.htm.
