

Change Is In The Air

The Charlotte Hungerford Hospital

And Its Off-Site Service Providers Will Become

Smoke & Tobacco Free Environments

Beginning September 1, 2007

We are committed to improving patient safety by offering exceptional care in a quality environment. By eliminating tobacco use at our facilities, we seek to promote better health and reduce the effects of second-hand smoke for all of our patients, employees and visitors.

Our new policy means that smoking will not be permitted in or around our campus and off-site buildings including waiting areas, parking lots and motor vehicles parked on our properties.

Thank you for helping us maintain a healthy place for healing in Northwest Connecticut.

If you have questions or need more information on quitting smoking, call 496-9381.
