Danbury Hospital’s 18th annual Children’s Day was held on March 28. More than 3,000 children and their families attended and enjoyed the event. More than 300 Danbury Hospital and community volunteers worked together seamlessly for a successful event. A Congressman and five State Representatives attended and were in awe of our efforts to keep children eating right, staying healthy and active. Several posted our event photos on their official web-sites within days of the event taking place.

The Hospital realized not only state-wide media coverage but also metropolitan NY media coverage—all positive. More than a dozen community agencies including two state agencies (DCF-foster adoption, Dept. of Agriculture-CT grown) benefitted from exposure brought by participating in the event.

The kids, parents, politicians, DH Leadership and volunteers had a great time!
